MINOWA TAKEHISA

(54) PRODUCTION OF RARE-EARTH PERMANENT MAGNET

(57)Abstract:

PURPOSE: To obtain a well-balanced magnetic property by pressure-molding a mixed alloy powder in he magnetic field, sintering the molded body in a vacuum or atmosphere of inactive gas, and further applying aging heat treatment at such a low temperature as sintering temperature or below.

CONSTITUTION: An A alloy is composed of an R2T14B phase mainly (R: at least one or more kinds of rare-earth elements including Nd, Pr and Dy mainly, T: Fe and Co). A B alloy contains R, Co, Fe, B and Ga, and is composed of an R2T114B phase and/or an R rich phase, and a combined phase with at least one or more kinds of RT24L phase, R23 phase, RT22 phase, R2T27 phase and RT25 phase. Thus a well-balanced magnetic property can be obtained.
